(SPEAKER – Tim Francis)

On the technology front, we would encourage everybody to deploy multifactor authentication or MFA, across their network.

That's one of the most exploited vulnerabilities.

And if they can protect against that, that's a great thing.

Then make sure that they have irregular patching cadence for their software.

That they trained employees. And that they use an endpoint detection and response (EDR) program if available.

And have an incident response plan and practice it.
